PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering graduate with strong foundations in full-stack web development, data structures, and algorithms. Proficient in JavaScript, Java, Python, React.js, Node.js, Express.js, and SQL. Experienced in building REST APIs, CI/CD pipelines, and machine learning models. Familiar with Agile development practices and Git-based workflows. Proven ability to deliver production-ready features with measurable impact, seeking a Software Engineer or Full Stack Developer role in a growth-oriented organization.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, REST API Development

Databases: MySQL, MongoDB

DevOps & Tools: Git, GitHub, CI/CD Pipelines, Docker (Basics), Agile, VS Code, Postman, Netlify, Vercel, Render

CS Fundamentals: Data Structures, Algorithms, Unit Testing, OOP

INTERNSHIP EXPERIENCE

DevOps Intern | Spring Capital

3 Months

- Built and maintained CI/CD pipelines that reduced deployment time by ~35%, automating build, test, and release stages.
- Managed Git branching strategies and version control practices, supporting a team of 5+ developers with zero merge conflicts.
- Automated deployment monitoring scripts that detected and flagged 90% of failed builds within 2 minutes of execution.
- Containerized 3 application services using Docker, achieving consistent parity between development and production environments.

React.js Intern | Trill Company

1 Month

- Developed 10+ reusable React components used across 3 web applications, reducing UI development time by ~25%.
- Built fully responsive layouts using Tailwind CSS, improving mobile usability score from 68 to 91 on Lighthouse.
- Integrated 5 REST API endpoints with frontend components, enabling real-time data rendering for end users.
- Refactored legacy component logic, reducing average page load time by 20% through code splitting and memoization.

PROJECTS

Phishing Website Detection using Machine Learning (Major Project)

- Engineered a classification pipeline using Random Forest and XGBoost, improving detection accuracy from 92% to 99% on 10,000+ URLs.
- Extracted 30+ URL-based and domain-based features including WHOIS records, DNS metadata, and URL structure patterns.
- Applied data preprocessing and feature selection techniques that reduced false positives by 40% compared to baseline models.

HealthAI – Intelligent Healthcare Assistant

- Built an AI-powered healthcare chatbot using IBM Granite, capable of analyzing 15+ symptom categories and returning structured health guidance.
- Designed a conversational backend with context retention, reducing average user query resolution to under 3 exchanges.

SaaS Contracts Dashboard

- Developed a scalable React dashboard handling 100+ contract records with filtering, sorting, and file upload simulation features.
- Implemented Tailwind CSS responsive design achieving consistent layout across mobile, tablet, and desktop breakpoints.

Online Shopping Platform with Email Automation

- Built a full-stack e-commerce platform supporting product listing, cart management, and order processing using HTML, CSS, JavaScript, and MySQL.

- Integrated automated transactional email notifications triggered on order events, reducing manual follow-up by 100%.

EDUCATION

B.Tech – Computer Science and Engineering	2023 – 2026
MJRA College of Engineering and Technology, Andhra Pradesh	
Diploma – Mechanical Engineering	2020 – 2023
Government Polytechnic, Andhra Pradesh	

CERTIFICATIONS

AI-ML Virtual Internship | Google Android Development | Deloitte Data Analytics Job Simulation | GenAI Powered Data Analytics | Ethical Hacking | DevOps Intern – Spring Capital
